Special Needs: Please contact CPI at **877.816.4524** if you have any special needs or disabilities that require assistance.

“Since attending the program, not a day has gone by that I haven’t thought of what I learned and tried to apply it on the job.”

Shannon Windmeyer, OT
Cary, NC

Dementia Capable Care: Therapist Training

Includes *Foundation and Dementia Therapy Applications Courses*

This two-day training is designed for therapy professionals who work with persons with cognitive impairment related to Alzheimer's/dementia. Participants learn how to evaluate, treat, and document reimbursable services for those with chronic and

progressive dementias using the Cognitive Disabilities Model by Claudia Allen as the key frame of reference. An introduction to administration, scoring, and setup of the Large Allen Cognitive Level Screen (LACLS) is presented. Participants learn how to discover and facilitate the best ability to function of persons with Alzheimer's/dementia at all stages, and to create reimbursable maintenance programs and realistic discharge plans.

"This training has given me the tools and a positive frame of reference to use in helping others unlock the joys of life inside the person living with dementia. Thank you for this wonderful training."

Julie Nelson, OT
HealthEast Care System
St. Paul, MN

About Us

CPI's team of Dementia Care Specialists is dedicated to advancing person-centered care for those living with Alzheimer's/dementia and other cognitive challenges. The total solutions we offer can help transform staff capabilities and quality of care. As a result, clients and their families experience a higher quality of life, caregivers find more job satisfaction, and providers improve their business results.

Visit [crisisprevention.com/dcs](https://www.crisisprevention.com/dcs) to learn more about our:

- Interdisciplinary, results-oriented **training** programs.
- **Consulting** services that focus on cognitive habilitation and memory care.
- Industry **recognition programs** for individuals and facilities.
- Dementia-related **resources** to support our commitment.

Dementia Capable Care: Foundation

The first day of training establishes the fundamental concepts and skills to provide *Dementia Capable Care*. Course objectives include:

- Identify empowering paradigm shifts to create successful outcomes for those with dementia.
 - Demonstrate an understanding of Alzheimer's disease and related dementias and their impact on cognitive function.
- Identify cognitive assessments and screening tools to identify best ability to function.
 - Describe the best ability to function and key remaining abilities for each dementia stage, as defined by Allen Cognitive Levels.
 - Identify key care approaches for each dementia stage to promote the highest possible level of function in ADL, mobility, and leisure activity.
 - Understand strategies to enhance communication, minimize negative behaviors, and support families.

Dementia Capable Care: Dementia Therapy Applications

The second day builds upon the fundamental concepts, providing therapists with specific and enhanced skills on how to evaluate and treat persons at all cognitive levels and the keys for documentation and reimbursement. Course objectives include:

- Examine Allen Cognitive Levels and performance modes.
- Describe cognitive assessment tools associated with the Allen Cognitive Disabilities Model.
- Identify how to administer, score, and set up the Large Allen Cognitive Level Screen (LACLS).
- Examine and practice writing goals and treatment plans for each Allen Cognitive Level.
- Describe the influence of Can Do, Will Do, May Do, and other factors on performance and facilitation of functional potential.
- Discuss keys for reimbursement.
- Understand how to create and implement a successful maintenance program.

Our Faculty Team

Our faculty team rotates; one or more faculty team member will facilitate your program. For Instructional Personnel Information and Disclosure(s), please visit cpisite.com/disclosure.

Chris Ebell, OT/L, DCCT

Chris is the lead DCS trainer and an Allen Authorized Instructor. Chris received her B.A. degree in Psychology from the University of Dayton and her B.S. degree in Occupational Therapy from Chicago State University in 1987. In her many years of experience, she has specialized in geriatrics in various settings including psychiatry, hospital rehab, skilled nursing, and home health. Chris lectures frequently on issues related to dementia management.

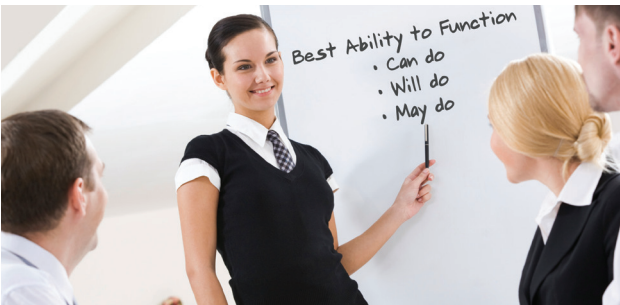

Sharon R. Host, OTR/L, DCCT

Sharon received a B.S. degree in Occupational Therapy from the University of Birmingham in 1996. Specializing in geriatrics, she has many years of experience in the long-term care setting and has also provided home health care. Sharon has presented at numerous conferences, including AOTA, ALOTA, and the Allen Cognitive Network Symposium, on topics such as behavior management, pain management, and positioning. Sharon has extensive expertise in Medicare documentation and has worked as an appeals specialist. She currently is a consultant and trainer with Dementia Care Specialists.

Kim Warchol, OTR/L, DCCT

Kim is president and founder of Dementia Care Specialists with over 22 years of experience as a practicing OT. Kim is an expert in the Cognitive Disabilities Model developed by Claudia Allen. Since 1999, she has educated over 5,000 therapists and other health care professionals on a best-abilities approach to dementia evaluation, treatment, and programming. In addition, she has set up many dementia living environments and care programs using this model.

Let us bring this training to you!

We can bring *Dementia Capable Care: Therapist Training* directly to your organization as an exclusive presentation for groups of 10 or more. Call **877.816.4524** for more information about on-site training and sponsorship opportunities.

“This kind of focused care can help caregivers intervene in behavioral issues such as aggression, depression, or wandering, sometimes eliminating the need for medications prescribed to change behaviors.”

Ann Irwin, SLP
Russellville, AR
