

NCI™ With Advanced Physical Skills Training, 3rd Edition

CONTENT OUTLINE

Program Summary and Philosophy

CPI's NCI™ With Advanced Physical Skills 3rd Edition Instructor Certification Program models the course that the Certified Instructor will be teaching back at your organization and provides Instructor Training for participants to gain knowledge and practice related to teaching the course and integrating it within your organization.

The NCI™ With Advanced Physical Skills 3rd Edition course provides staff with an effective framework for preventing, de-escalating, and safely responding to crisis behavior. The program introduces how to apply knowledge of brain and behavior to understand distress behavior and the reasons for distress. Participants will look at analyzing the risk of behavior and identifying strategies to mitigate the risk. They'll practice strategies to identify escalating behaviors in others as well as use effective approaches to intervene during different crisis levels. Participants will gain a broad range of tools to help them manage their own emotional responses and implicit bias in stressful situations.

There is a focus on staff using the philosophy of *Care, Welfare, Safety, and Security*SM and using trauma-informed and person-centered approaches in their interactions with the people in their care. This expands throughout the continuum of interventions necessary when working toward the reduction or elimination of restraint. The program realistically addresses the serious issue of restrictive intervention through careful assessment of risks and an evaluation of what is the last-resort, reasonable, proportionate, and least restrictive intervention. The principles and techniques taught in CPI's Safety Interventions (disengagement skills and holding skills) recognize the critical importance of staff confidence and their ability to safely respond to crisis situations. CPI post-crisis strategies assist staff to support individuals and collaborate to identify plans as well as help staff teams recognize opportunities to learn prevention strategies in the aftermath of a crisis.

The blended program is comprised of two parts. Part one is an online course, *Nonviolent Crisis Intervention*[®] training, which provides the core program content. Part two has four classroom days that focus on application of *Nonviolent Crisis Intervention*[®] content, advanced physical skills, and Instructor Training.

The classroom program has five classroom days that provide the core *Nonviolent Crisis Intervention*[®] content, advanced physical skills, and Instructor Training.

Crisis Prevention Institute trains and certifies designated people from your organization. After they have been trained by a CPI Global Professional Instructor and successfully passed all components, including the instructor exam, they are qualified to teach at your organization using the approved CPI training materials.

Program Objectives

- Use the philosophy of *Care, Welfare, Safety, and Security*SM and a person-centered and trauma-informed approach when responding to a person in distress.
- Interpret distress behaviors and address the cause of the behavior to de-escalate the situation.
- Assess risk of behavior using the *Decision-Making Matrix*SM and identify preventive strategies to mitigate risk.
- Identify and respond appropriately to various levels of crisis behaviors.
- Manage your own emotional responses to distress behavior.
- Use your communication skills to be supportive and strengthen your interventions to de-escalate potential conflict situations.
- Use directive strategies when verbally intervening to de-escalate defensive behaviors.
- Use the *Decision-Making Matrix*SM in the moment of Risk Behavior to determine Safety Interventions that represent a reasonable, proportionate, least restrictive, and last-resort course of action.
- Use safety intervention strategies to maximize safety and minimize harm in situations where behavior presents an imminent or immediate risk of harm to self or others.
- Apply a process for support and learning at the end of a crisis situation.
- Explain how you will consider the Physical Skills Review Framework and key legal and professional considerations when using non-restrictive disengagements and restrictive interventions.
- Describe and demonstrate proper use of non-restrictive disengagements and restrictive interventions for an individual presenting risk behavior.
- Practice restrictive interventions for higher-risk situations in the workplace.

Facilitation Methods

The online portion of the course presents the content through narration, video, and interactive activities. The content learned in the online portion of the course will be practiced in the classroom.

The classroom portion of the course includes use of an Electronic Presentation with activities that will aid participants in the implementation of the NCI™ With Advanced Physical Skills 3rd Edition Training. Extensive application, case studies, examples, competency-based testing, and an exam ensure that participants gain knowledge and are able to demonstrate skills introduced in the program. Participants will also complete teach backs of the content.
